March 10th 1953.

Dear Friends,

In presenting the above price list to you, I have done my best to present to you a list of top notch glads. They are not all the newest varieties by any means. Some were brought out way back when I was a boy, but they are still winning ribbons at the shows or they are good cut flower varieties.

In my garden I raise over three hundred varieties, but I am only listing one hundred and thirty, the rest are under test, insufficient quantities or I do not consider them good enough to list.

I would like to say a word about quality. All bulbs sent out are guaranteed to be true to name and good clean stock. My Gladiolus are state inspected both in the field and in storage. I hold New York State inspection certificate number 946. If upon receiving

your bulbs, you are not completely satisfied with the shipment, please notify me promptly and I will do my best to make an adjustment. I can not continue in business without satisfied customers.

As to growth. I can not be responsible for the crop account of variation in growing conditions and other things beyond my control, neither can I guarantee germination of bulblets. All my stock has been treated with copper and D D T, therefore they do not need treating at time of planting.

The NAGC size and color classification is used in my price list. First is the name of the variety then in parenthesis is the name of the originator and the year in which the variety was first available to American purchasers. Then following is the color classification, (the color classification is mainly for show purposes) then the number of days it takes to bloom.

On many of the older varieties, I have only gouted on large number one bulbs. If sold out on the large bulbs I will send you better value in smaller sizes. All bulbs are guaranteed to bloom. A package of bulblets will contain about 100 bulblets.

Yours for a Successful Glad Year,  
Howard B. Myers
